## Common Slot Breakout V2

```
—The Banana Jack Part is 575—4
-—I placed the banana jacks 750 mil apart as that is standard US dual plug spacing —The switch is 100SP1T1B1M1QEF
—The light pipe is VLP—650—R
——The light pipe is available in various heights
—Enable is available on a header.
——This allows the power switch to be DNP if you want to save $2
```
